Fender Studio Pro X

A free community expansion that gives you your own version of Fender Studio Pro 8, in **10 packages**. It installs on your own licensed copy, never touches licensing, and uninstalls in one click.

> **Vibe-coded by a non-programmer: expect bugs.** Back up your songs first.

PACKAGES 01 TO 05

01 **Skins.** Liquid Glass and Graphite, built on your PC from your own Studio Pro, with a Skins page in Options and live colour changes.
Switches: Skins page, Live colours

02 **Home page.** A calm Start page: your sessions, a Quick start card with your templates, music news, your artist card and your audio device.
Switches: Session library, News, Spotify panel (off) · adds Skins

03 **Name and icon.** "Fender Studio Pro X" in the title bar and the X app icon.
Switches: Hide About and Check for Updates (off)

04 **Track List.** A redesigned Track List with saved views, search and quick show/hide.
adds Skins

05 **Plug-in browser.** Instruments and Effects as a modern panel: filters, favourites, folders and search.
adds Skins

PACKAGES 06 TO 10

06 **Sound search.** Find samples by name, type, key and tempo in Browser > Files; MIDI files play too.
adds Skins

07 **YouTube panel.** Search YouTube audio in Browser > Cloud, preview it and bring it into your song (needs yt-dlp and ffmpeg).
off at first, adds Skins

08 **Look extras.** Smooth motion, glass pop-up menus, rounded ruler markers and loop.
Switches: Smooth motion, Glass pop-ups, Ruler markers and loop

09 **Pitch curves.** Draw and edit per-note pitch curves in the piano roll.

10 **AI tools.** A chat assistant that can drive Studio Pro (any MCP client too), the AI Lab tab, and optional better stems.
Switches: Chat assistant & bridge, AI Lab, Better stems (off) · off at first

Core (the mod loader and the web-panel crash guard) is always installed. Version 1.2.0.

New in 1.2.0: a much faster Sound search that also plays MIDI files on the selected track, and a Quick start card on the Home page (one click starts a song from your template). 1.1.0 brought smooth backgrounds with no film grain, one soft accent light, a stronger Glass tint, a cleaner transport and Rename on the home page.

INSTALL IN 3 STEPS

1 Close Studio Pro and unzip the pack.
2 Double-click `Install.bat`, tick the packages you want. It adds what they need and shows a summary first.
3 Skins build from your own copy, then pick one in Options > Skins.

BACK TO STOCK

Hold `Shift` at start for the stock look, run `Uninstall.bat` for plain Studio Pro, or use a package's own Uninstall.bat to remove just that one.

Licensing untouched. No Fender files shipped. Free, MIT licensed. Windows 10/11, Studio Pro 8 (tested on 8.1.2). Made by Roche with thanks to the Studio One team. Studio One and Studio Pro are trademarks of their owners.
